PROFESSIONAL EXPERIENCE

SnapIQ | snapiq   Aug 2024 - July 2025
Software Engineer
I've built an **AI agent** that automates and speeds up resolving customer support tickets for **Airlines**.
integrating with Various APIs and Data Points.
in Addition to **full-stack** development, and **DevOps**. I'm also running the Ai Side of the product. Mainly self-hosting LLMs and Various AI Models to work in a **secure** environment to protect Highly sensitive Data.

Gymip | gymip.com   June 2023 - April 2025
Founder - Full-stack developer
Gymip aims to help people be more consistent with working out, by providing a workout tracker/assistant and a healthy community.

Subz | subz ig   Feb 2024 - July 2024
Full-Stack Software Engineer
Subz served SMB clients offering them marketing tools. and using Ai to speed up and simplify workflows.
I've lead the technical team to create an **Ai Website Builder** And many Marketing tools for SMBs.

Misk Foundation | edu-virtual-map   Sep 2023 - Dec 2023
Remote Backend Software Engineer
We created a scholar orientation platform for Saudi students, it showcases all the universities in the country in a Saudi Arabia Map. This experience further developed my organisational and communication skills.

EcomVite   Nov 2022 - July 2023
Co-founder - Software Development
in ecomvite, we made solutions for e-commerce vendors.
This project put us in contact with key players in the Moroccan e-commerce space.

Internal booking platform - OCP group - Leet initiative   June 2022 - Aug 2022
Backend Freelance Software Developer
One of the projects I worked on as a freelance developer. an internal booking platform for OCP Jeff Soffer.
We worked on assessing the problems, Making the UI/UX for the solution, and building the platform.

SKILLS

- **Software Architecture:** Planning And Architecting scalable, reliable and secure software projects
- **Backend:** (NodeJs - NestJs - PostgreSQL)
- **Frontend** (ReactJs - NextJs)
- **Mobile Development:** (Flutter)
- **DevOps:** (Github Workflows ,Docker, Linux...)
- **Ai integration:** Experience in integrating GenAi into backend systems.

ACTIVITIES

Competitions: Played a key role in competitions that ranked my school 1337 and country morocco high on the international leaderboards. (CodinGame, HashCode, National Hackathons...)
Event Organization: Back in school I took part in creating and organising over 12 events (Treasure hunts, Escape rooms, paintball trips & hackathons) with over 2000 participants in total. And handling everything via custom made platforms.
